02 PRODUCT OVERVIEW

2.1 Brief Introduction

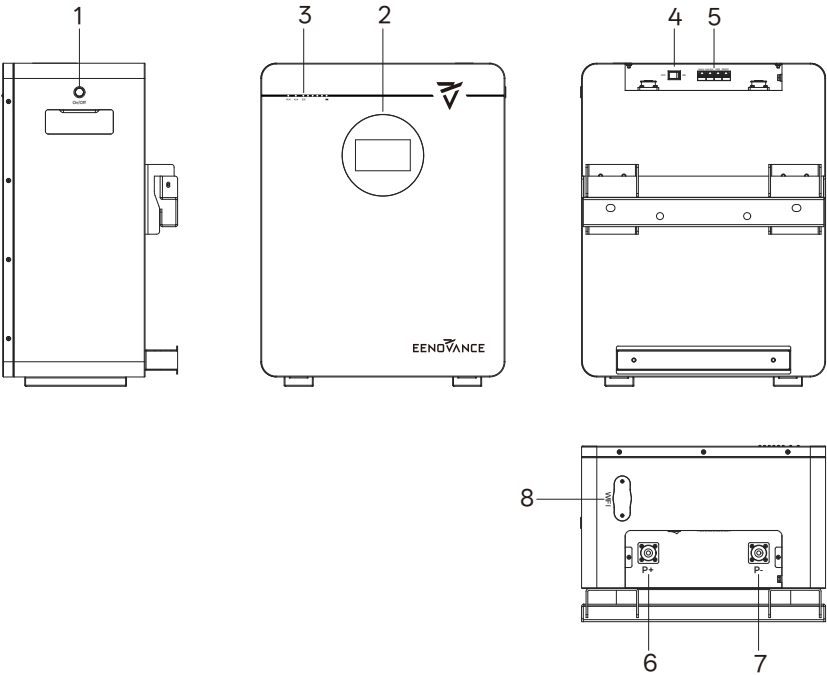

PRODUCT OVERVIEW

ECO 8.0-1M1 is a lithium battery with an operating voltage range of 22.4~28.08V. It is designed for residential energy storage applications and is compatible with 24V battery hybrid inverter. ECO 8.0-1M1 is not suitable for supporting life-sustaining medical devices.

ECO 8.0-1M1 has built-in BMS (Battery Management System), which can manage and monitor cells information including voltage, current and temperature. Besides that, BMS can balance cells charging to extend cycle life. BMS has protection functions including over-discharge, over-charge, over-current and high / low temperature; the system can automatically manage the charge state, discharge state, and balance state.

Up to 15 ECO 8.0-1M1 can be connected in parallel to increase capacity and power.
